

## ABSTRACT

**Nahdiyah, Emil. 2024. *Implementation of the No Smoking Area at SMPN 12 Malang in the Janti Health Center Working Area*, Thesis, Poltekkes Kemenkes Malang Bachelor of Applied Health Promotion Study Program. Supervisor I: Sri Winarni, S.Pd., M.Kes., Supervisor II: Dr Ganif Djuwadi, SST, S.Pd, M.Kes.**

*Smoking is one of the behaviours that is detrimental to the health of ourselves and the people around us, diseases caused by smoking can ultimately weaken the potential of human resources. In response to this, the government has formed a programme to deal with cigarette smoke, one of which is the No Smoking Area (KTR), and there are seven places that must implement a smoke-free area, one of which is a place of teaching and learning. This study aims to determine the implementation of a smoke-free area at SMPN 12 Malang in the Janti health centre working area as a step towards realising a smoke-free school environment. The type of research used is descriptive quantitative research. The population of this study is the whole of the object of research. The sampling technique used was total sampling of 72 people. The sample in this study were all teachers, staff, security officers, janitors, and canteen guards at SMPN 12 Malang. Data collection techniques using questionnaires, observations, and interviews and the instruments used are questionnaire sheets, observation sheets, and interview guidelines. The results of the research in the implementation of the smoke-free area at SMPN 12 Malang found that the policy pattern was good, human resources were sufficient, and the sign of the smoke-free area was good. The recommendation is to form a commitment and write a decision letter for special officers to supervise the non-smoking area, create sanctions for non-smoking area violators, and strategic placement of non-smoking area signs such as at the entrance gate, toilet, and canteen.*
