

## ABSTRACT

**Rahma, Harin Alvina. 2024. *The Correlation of Knowledge and Motivation With Cadre's Activeness In The Toddler Integrated Healthcare Center (Posyandu) In The Working Area of Public Health Center (Puskesmas) of Wagir, Thesis, Malang Ministry of Health Polytechnic, Bachelor of Applied Health Promotion Study Program. Supervisor I: Dr. Farida Halis DK, S.Kp., M.Pd, Supervisor II: Dimas Dwi Yoga Saputra, SST., M.Kes.***

*Cadre activity plays an important role in posyandu activities. Knowledge and motivation are factors that influence cadre activity, because cadre knowledge about posyandu and cadre motivation in posyandu will influence posyandu activities so that the success of the posyandu work program can be achieved. The aim of this research is to determine the relationship between knowledge and motivation on the activity of toddler cadres. This type of research is quantitative research with a research design cross sectional. The research population was all cadres in the Wagir Health Center Working Area, Malang Regency, totaling 823 people, sampling technique cluster sampling with a sample of 160 people. The instrument is a knowledge questionnaire with multiple choice and motivational questionnaires with scale likert. Data analysis using tests chi-square with  $\alpha = 0.05$ . The results of the research show that there is a relationship between knowledge and the activeness of toddler posyandu cadres ( $p$ -value = 0.001) and there is a relationship between motivation and activity of toddler posyandu cadres ( $p$ -value = 0.001) in the Wagir Community Health Center Working Area, Malang Regency.*
