

ABSTRACT

Name : Fempi Zahrah Irvika Pamuji
Study Program : Medical Record and Health Information
Title : Compilation of Diagnosis Codefication Pocket Book at Pulung Ponorogo Health Center

At the Pulung Ponorogo Health Center, it was found that diagnosis coding activities were carried out by officers who did not have a medical record educational background. The medical record officer at the Pulung Ponorogo Health Center has an educational background in Health Promotion and high school education. From the results of interviews with informants, it was found that the officer had never participated in coding training activities. In the coding activities carried out by officers, they often use Google to determine disease coding. The method used in this research is descriptive qualitative research method.

The qualitative descriptive technique in this study was to create an auxiliary media for the diagnosis codification process in the form of a diagnosis codification pocket book. In this research, there are specific objectives for making pocket books, namely analyzing material requirements and pocket book data, making book cover designs, book contents, book colors, and implementing & evaluating pocket book making. The measuring tool for this study used individual interviews. This interview aims to gather information related to the specific research objectives needed in the process of making a diagnosis codification pocket book.

The evaluation of making a codefication pocket book is the lack of adding color variations to the contents of the diagnosis codification pocketbook. The results of the research conducted from February 11 2023 to April 23 2023 are purple book covers mixed with white. The contents of the diagnosis coding pocket book contain the contents of the diagnosis coding pocket book on the annual data of SP2TP Pulung Ponorogo such as diagnosis codes, disease names according to disease groups and alphabetically. The codification pocket book that the researcher has made is 10cm x 18cm in size using glossy matt paper. With this size, it can be stored in shirt and trouser pockets.
