

ACKNOWLEDGEMENT

All praise is due to Allah SWT for His grace and guidance, which enabled the author to complete this thesis titled "The Relationship between Interdialytic Weight Gain and Intradialytic Blood Pressure Changes in End Stage Renal Disease Patients Undergoing Hemodialysis at Lavalette Hospital". This thesis was written to fulfill one of the requirements for achieving the Bachelor of Applied Nursing degree at the Bachelor of Applied Nursing Study Program, Nursing Department, Health Polytechnic of the Ministry of Health Malang. This thesis was made possible through the guidance, direction, and assistance from various parties, whom the author cannot individually name. On this occasion, the author expresses gratitude to:

1. Afnani Toyibah, A.Per.Pen., M.Pd, as the Acting Director of the Health Polytechnic of the Ministry of Health Malang
2. Dr. Erlina Suci Astuti, S.Kep., Ns., M.Kep, as the Head of the Nursing Department, Health Polytechnic of the Ministry of Health Malang
3. Dr. Arief Bachtiar, S.Kep., Ns., M.Kep, as the Head of the Bachelor of Applied Nursing Study Program, Health Polytechnic of the Ministry of Health Malang
4. Maria Diah Ciptaningtyas, S.Kep., Ns., M.Kep., Sp.MB as the supervising lecturer who has dedicated her time, effort, and thoughts, patiently guided, directed, and provided invaluable input during the thesis writing process
5. Lavalette Hospital Malang, for granting permission and support in collecting research data at the Hemodialysis Unit. The support from the hospital, both in terms of facilities and access to data, was highly significant for the smooth execution and success of this research
6. The nurses of the Hemodialysis Unit at Lavalette Hospital, for their permission, assistance, and cooperation during the data collection process of this research. The support provided, whether in the form of information, technical guidance, or a conducive atmosphere, greatly assisted the smooth implementation of this research

7. Both parents, who constantly prayed for and provided continuous encouragement and support to the author; every prayer uttered and every encouragement given became the author's primary strength in overcoming every process throughout this educational journey
8. The best friends, Alfi Ika Purwati, Chirana Karsa Medis, and Tiami Feby Ayuningtyas, who greatly contributed to assisting this research. Thank you for all the invaluable support, encouragement, laughter, and togetherness
9. Deepest gratitude to someone special who has always been present to provide encouragement, who always offered solutions when the author faced problems while working on this thesis. Thank you for the endless patience, support, prayers, and understanding during the author's most difficult times in completing this thesis
10. The author also wishes to express gratitude to herself, for striving, enduring, and continuing to move forward despite facing various challenges and doubts. Thank you for choosing not to give up, for enduring late nights, and for remaining committed to completing this thesis.

The author recognizes that there are still errors and shortcomings in the preparation of this thesis. Therefore, the author humbly hopes that readers can provide constructive criticism and suggestions. Therefore, the author sincerely apologizes for any errors or shortcomings in this thesis. It is hoped that this final assignment will benefit the development of science and particularly serve as a reference for future research related to hemodialysis and nursing care for ESRD patients.
